

## Byewaste now also picks up old mattresses in Capelle aan den IJssel

Byewaste is creating a more sustainable future by collecting the things that people no longer use from their houses. Starting this week, the residents of Capelle aan den IJssel can also get rid of their old mattress by means of the free collection service.

*We keep thinking of new ways to make our users' lives easier. That is why we now also collect old mattresses from peoples' homes in Capelle aan den IJssel. This saves the residents of this municipality a lot of time and effort. After the mattresses have been collected, they are recycled by our partner RetourMatras.*

### How it works

*To easily get rid of their old mattress, our users just need to choose a suitable day and time in the app. When they put the mattress outside in front of the building that they live in prior to the chosen time slot, our collectors will pass by to pick it up.*

*It is highly important that the mattresses are clean and dry during the pick-up. Otherwise, they cannot be recycled. The packaging materials of the new mattress can be used to protect the old one from moisture.*

**It is time to say goodbye to waste. We are grateful for  
all supporters who dream with us about a world without waste!**
